M12	79 Nm	58.2 lb-ft

Suzuki DL650 engine guard Installation manual

Set includes:

1. Place the motorcycle so that it is not based on the side stand. Remove the bolt that secures the exhaust system and the front bolt of the side stand.
2. Install the guard bracket (2) as shown in Fig. I. with bolt (10) with washer (11) and bolt (12) with the original washer mounted earlier on the motorcycle.
3. Put the mounting clips (3) on a crashbars as shown in Fig. II., and tighten the guard (1) to these clips as shown in Fig. III., using the bolts (4), washers (5) and nuts (6).
4. To the bracket (2) screw the guard (1) as shown in Fig. IV. using bolts (7), washers (8) and nuts (9).

After the first 50km check if all threaded connections are tightened to the correct torque.

Screw tightening torques table:

M6	9,6 Nm	7.1 lb-ft
M8	23 Nm	17 lb-ft
M12	79 Nm	58.2 lb-ft
